

Wild Horse Locations across the World

NOTE: The ABA defines a Wild Horse as:

...a wild horse that survives in an unrestrained, untamed state in a natural herd structure whereby natural selection decrees the type that survives in that environment.

With this in mind, there are many populations of wild horses around the world.

[Please note: this sections is currently under construction!]

Australia

Brazil

Colombia

Canada

Ethiopia

France

Greece

India

Japan

Kazakstan

Mongolia

Namibia

Netherlands

New Zealand [add link to Kaimanawa, noting another population also N/E of NZ]

Poland

Romania

Spain

Tibet

Poland

Portugal

United Kingdom

United States
